

AEROX® AVIATION OXYGEN SYSTEMS ACQUIRES N23D SERVICES, LLC

Expands FAA-PMA Oxygen and Compressed Gas Cylinder Product Lines

BONITA SPRINGS, FLORIDA – July 16, 2025: Aerox® Aerospace Group, the parent company of aviation oxygen specialists Aerox® Aviation Oxygen Systems, Omnigas Systems, Inc., and Aerox® Fluid Power, today announced its acquisition of N23D Services, LLC a provider of value-added FAA-PMA aftermarket gas cylinders for aerospace oxygen and compressed gas systems catering to commercial aviation, business aviation, and military customers.

The acquisition of N23D Services solidifies Aerox's commitment to delivering comprehensive aviation oxygen solutions to the global aerospace industry. Aerox® specializes in oxygen systems engineering and manufacturing for leading airframe manufacturers, aero-medical interiors manufacturers, and other oxygen systems integrators. Following Aerox's acquisition of Omnigas Systems earlier this year, the addition of N23D Services further enhances Aerox's capabilities to support a broader in-service fleet and a wider range of oxygen system manufacturers.

"We are confident that our acquisition of N23D Services will enhance our ability to serve the needs of our common customer base," stated Scott E. Ashton, President and CEO of Aerox®. "N23D Services brings a broad portfolio of FAA-PMA compressed gas cylinders for aviation oxygen and pneumatic systems, and evacuation slides. Combined with the overhaul and repair capabilities in both oxygen components and fire suppression systems at Omnigas Systems, we are confident that the integration of N23D Services will deliver further exceptional value to our combined global customer partners."

N23D Services will operate as a wholly-owned subsidiary of Aerox® Aviation Oxygen Systems. Aerox® also announced that N23D executive Paul Mira has joined Aerox® as Quality Manager, N23D. This acquisition marks the fifth for Aerox® Aerospace Group, following the acquisition of Aerox® Aviation Oxygen Systems in 2020, Sky-Ox® Aviation Oxygen in 2022, Fluid Power, Inc. in 2023, and Omnigas Systems, Inc in 2025.

Alderman & Company® served as exclusive financial advisor in the sale of N23D Services, LLC to Aerox® Aerospace Group.

ABOUT AEROX AVIATION OXYGEN SYSTEMS®

Aerox® is a leading designer and manufacturer of aviation oxygen systems and accessories. Since 1981 Aerox® has provided the aviation industry with innovative aerospace solutions for ensuring pilot wellness, alertness, and safety. Aerox® offers a comprehensive oxygen systems product line including OEM and STC installed oxygen systems, TSO-approved oxygen masks, PMA Oxygen Cylinders, and portable oxygen solutions. Its newest oxygen system product is the Lighter than Air Walkaround Portable Oxygen kit, which has been selected for numerous airline cargo conversions. Visit Aerox at <https://www.aerox.com>.

ABOUT N23D SERVICES, LLC

N23D Services, LLC is a leader in the PMA compressed gas cylinder industry for aerospace customers. N23D Services offers PMA Cylinders for evacuation slides, oxygen systems, and pneumatics. N23D Services PMA cylinders cover the entire aviation industry from commercial airliners to business jets, general aviation, and military applications. Our cylinder types include aluminum lined / Kevlar-wrapped cylinder, steel, and titanium cylinders.
